EDUCATION

B.Tech in Electronics and Communication Engineering

2022 - 2026

Institute of Aeronautical Engineering | CGPA: 7.2/10

SKILLS

Languages	Python, JavaScript, SQL
Web Frameworks	FastAPI, Node.js, REST APIs, React, HTML, CSS, Tailwind CSS
AI/ML	YOLO, CNN, OpenCV
DevOps	Docker, Nginx, Cloudflare
Databases	Firebase, MongoDB, Redis, MySQL, PostgreSQL
Tools	Git, GitHub, Vercel, Postman, AWS, Claude code, Co-Pilot CLI, Ollama, Anti-gravity

EXPERIENCE

Independent Software Developer

- Designed and developed **Klovra Fashion Hub**, a full-stack e-commerce platform enabling end-to-end user flow from product browsing to cart, checkout, and order placement with responsive UI. | [Website](#)
- Built **PV Enterprise Inventory Management System** with features including invoice generation, real-time inventory tracking, sales analytics, and admin control for managing stock and transactions. | [Website](#)

PROJECTS

Autonomous AI Agentic Team | [GitHub](#)

Node.js | React | Docker | MCP | Ollama | Claude code CLI

- Built a multi-agent AI system that converts high-level ideas into production-ready software using coordinated workflows and Agents.
- Implemented MCP-based communication, shared memory, and real-time WebSocket dashboard for agent monitoring.

Distributed College Event Management System | [GitHub](#)

React | Firebase | Docker | Nginx | Redis | Cloudflare | Vercel

- Developed a scalable web platform for managing college events, registrations, and admin operations.
- Designed high-availability architecture with microservices, load balancing, caching, and CDN integration for performance.

Helmet and Triple-Ride Detection using CNN and YOLO | [GitHub](#)

Python | Deep Learning (CNN) | YOLOv3 | TensorFlow | PyTorch | OpenCV | NumPy

- Developed a detection system using YOLOv3 and CNN to identify helmet violations and triple riding.
- Optimized the pipeline for real-time performance using TensorFlow, OpenCV and PyTorch.

PUBLICATIONS

- T.Karthik Sai, et al. "Real-Time Helmet Violation and Triple-Ride Detection System Using YOLOv3 and CNN for Intelligent Traffic Surveillance", Proceedings of ICMCER MARCH,2026 (Scopus). | [Certification](#)

EXTRA-CURRICULAR ACTIVITIES

- Hosted and developed the official **IARE Consortium event platform Webpage**, managing end-to-end event operations and registrations for over 1000+ participants.
- Worked as **Logistics Head in NSS**, contributing to social initiatives, supporting community-driven activities, and actively participating in social work and community service.
